

Committed
to
Care

Disposable Medical Devices

SPM Medicare Pvt. Ltd. has established a state-of-the-art manufacturing facility in the National Capital Region (NCR) of India for producing disposable medical devices and surgical products. Since its inception in 2015, SPM Medicare has emerged as one of the fastest-growing companies in India's medical sector, gaining recognition for its commitment to quality and service by manufacturing and exporting premium products at competitive prices. The company is also SEDEX certified, ensuring adherence to high standards of social compliance and responsibility.

The facility is equipped with advanced, automated machinery designed to optimize manufacturing processes and ensure product safety and quality. All products are manufactured in cleanroom environments, with in-house ETO sterilization and a dedicated quality laboratory, enabling compliance with both national and international regulatory standards. The company benefits from easy access to raw materials, a skilled and dedicated team, and support from leading financial institutions, ensuring smooth and reliable operations. Worker safety and hygiene are prioritized, with all employees required to wear recommended safety gear during production.

SPM Medicare maintains a Quality Management System certified to ISO 13485 standards by ITC (Czech Republic). Additionally, its products are CE certified by TÜV (Germany) and have received USFDA approval for various items. With these certifications from stringent quality authorities, the company has successfully marketed its products across India and in over 30 countries worldwide.

VISION

- To become the most respected organization in the Healthcare sector, touching a billion lives across the globe by providing safe and quality products and services.

MISSION

- To understand the requirements of our customers in the medical and healthcare sectors.
- To design and manufacture high quality products and services as per customer's requirements.
- To establish an environment wherein we are committed to provide world class care.

TECHNICAL SPECIFICATIONS

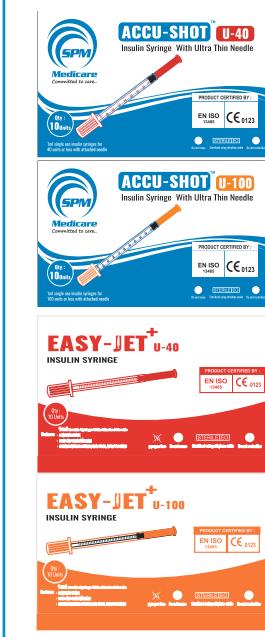

Accu-Shot or Easy-Jet Insulin Syringe (U-40 /U-100) is a sterile, single-use syringe for accurate, safe insulin delivery. It features clear markings for precise dosing and an ultra-fine needle for painless injection. Made from medical-grade, non-toxic materials, it's compatible with U-40 and U-100 insulin.

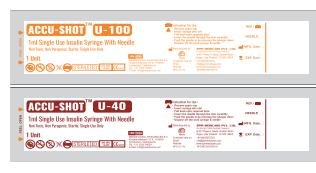

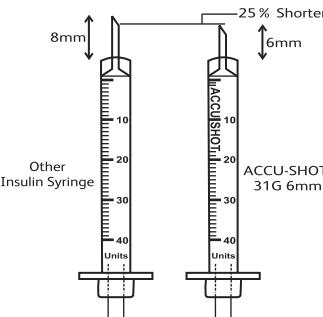

Features & Benefits:

- Accurate and easy to read dosage markings ensure precise insulin administration.
- Ultra-fine, sharp needle minimizes pain and tissue trauma.
- Polypropylene construction with smooth plunger movement enables controlled and comfortable injection.
- Ergonomic barrel design provides a secure and comfortable grip for easy handling.
- Protective needle cap maintains sterility until the point of use.

SAFETY NEEDLE

TECHNICAL SPECIFICATIONS

Easy Blood-Collect In-line Arterial Sampling Set is a sterile, single-use device for safe arterial blood collection. Its closed system reduces infection and air embolism risks while maintaining arterial line patency, ensuring accurate sampling and improved patient safety.

Features & Benefits:

- Closed-system design minimizes the risk of infection and air embolism.
- Enables safe and accurate arterial blood sampling without disconnecting the line.
- Maintains continuous arterial line patency, reducing blood loss and system contamination.
- Transparent components allow clear visibility of blood flow during sampling.
- Ergonomic and easy-to-use design enhances clinical efficiency and handling.

The Easy-Flush® Syringe is a sterile, single-use medical device designed to provide safe and efficient flushing of IV lines, catheters, and vascular access devices. Each syringe is prefilled with a sterile solution to ensure accurate dosage, easy use, and reduced contamination risk.

Features & Benefits:

- Sterilized by Gamma Radiation for assured product sterility and safety.
- Compatible with needleless connectors for safe and convenient access.
- Available in Luer Lock and Luer Slip tip types for versatile clinical applications.
- Made of medical-grade polypropylene ensuring strength, durability, and biocompatibility.
- Easy-to-read, clearly visible numbering allows accurate dosage measurement.
- Plunger and syringe barrel size are matched to ensure smooth movement and precise control.
- Sterile, single-use, individually packed to ensure infection control and prevent cross-contamination.
- 3-ring plunger (gasket) design helps prevent blood reflux and ensures reliable sealing during use.

HEPARIN FLUSH SYRINGE

Prefilled Heparin Flush Syringe (IU/ml)

EASY-FLUSH® Heparin

Available in:

- Packaging: Individual **Blister Pack**

Easy-Flush Heparin Syringe: A sterile, single-use, prefilled syringe designed to maintain IV catheter patency and prevent blood clot formation. Each syringe contains a precise dose of heparin solution, ensuring accurate administration and enhanced patient safety.

Features & Benefits:

- Sterile and Single-Use: Ensures patient safety by eliminating the risk of cross-contamination.
- Prefilled Syringe: Ready to use, reducing preparation time and potential medication errors.
- Maintains Catheter Patency: Prevents blood clot formation and occlusion in IV lines.
- Accurate Dosage: Each syringe contains a precise concentration of heparin solution for reliable flushing.
- Smooth Plunger Movement: Allows consistent flow and easy administration.
- Latex-Free and Non-Pyrogenic: Minimizes risk of allergic reactions and ensures product safety.
- Transparent Barrel: Facilitates visual inspection of the solution before use.
- Tamper-Evident Packaging: Guarantees product integrity prior to use.

SODIUM CITRATE FLUSH SYRINGE

GAMMA STERILIZED

Prefilled Sodium Citrate Flush Syringe - 4%

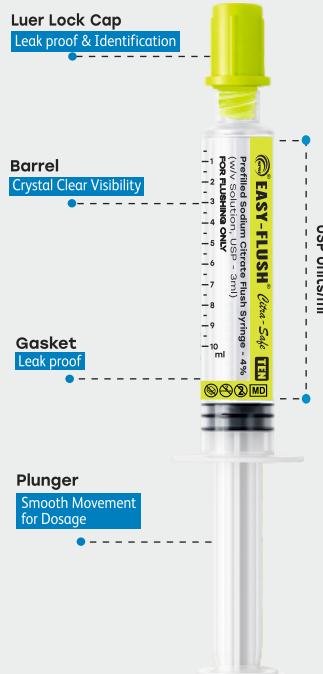

EASY-FLUSH® *Citra Safe*

Available in:

- Sizes: 3ml | 5ml | 10ml
- Packaging: Individual **Blister Pack**

TECHNICAL SPECIFICATIONS

Sodium Citrate Flush Syringe: A sterile, single-use, prefilled syringe designed to maintain IV catheter patency and prevent blood clot formation. Each syringe contains a precise dose of sodium citrate solution, ensuring accurate and contamination-free administration.

Intended Use: Prefilled syringe with tri sodium citrate solution, is intended to maintain the patency of an indwelling intravenous access device and catheters like CVC, Haemolysis catheter, etc. Prefilled syringe with Sodium citrate may be used following initial placement of the device in the vein, and during the medical procedure.

Features & Benefits:

- Sterile, single-use, prefilled syringe for safe and ready-to-use application.
- Maintains IV catheter patency and prevents blood clot formation.
- Accurate sodium citrate dosage ensures effective flushing and patient safety.
- Non-toxic, non-pyrogenic design reduces contamination risk and enhances reliability.

STERILE WATER

Pre-filled Syringe with Sterile water

EASY-FILL *Aqua*

10ml

Available in:

- Sizes: 10ml
- Packaging: Individual **Blister Pack**

Sterile water Flush Syringe: Sterile water is purified, non-pyrogenic, and free from microbial contamination. It is used for inflating Foley catheter balloons, diluting medications, and other medical applications, ensuring safety and single-use sterility.

Intended Use: The Prefilled Syringe with Sterile Water is intended for inflating the balloon of an indwelling Foley catheter after insertion, ensuring secure catheter placement. It provides a sterile, ready-to-use solution for single-use applications in clinical and hospital settings.

Features & Benefits:

- Sterile, single-use, prefilled syringe ensuring safe and contamination-free use.
- Ready-to-use design simplifies Foley catheter balloon inflation.
- Clear polypropylene barrel allows easy visibility of the solution.
- Sterilized by gamma irradiation for assured product safety and reliability.
- Leak-proof Luer lock design provides secure and reliable connection to the catheter.
- Smooth plunger movement allows effortless and controlled inflation.

Available in:

- Sizes: 10ml
- Packaging: Individual **Blister Pack**

Easy Fill GlyceSure: The SPM prefilled syringe with 10% glycerin solution is a sterile, single-use Luer lock syringe pre-filled with 10% glycerin for inflating Foley catheter balloons. Closed orange cap ensures sterility; sterilized by gamma irradiation.

Intended Use: The Prefilled Syringe with 10% Glycerin Solution is intended for inflating the balloon of an indwelling Foley catheter after insertion, ensuring secure placement and reliable performance. It provides a sterile, ready-to-use, single-use solution designed to maintain patient safety and prevent contamination.

Features & Benefits:

- Sterile, single-use, prefilled syringe for safe and convenient use.
- Contains 10% glycerin solution for reliable Foley catheter balloon inflation.
- Orange Luer tip cap maintains a closed, contamination-free system.
- Sterilized by gamma irradiation to ensure product safety and integrity.
- Sterilized by gamma irradiation for assured product safety and reliability.
- Individually packed to maintain sterility and ease of handling.

IV Cannula with Wings, with Blood Control, with Extension line & with Safety Feature

Sharp Needle Tip

Needle Free Injection Valve

Safety Guard (Super)

Easy-Vein Control-Way: A closed IV cannula is a sterile, single-use device designed to provide safe and leak-free intravenous access. Its integrated valve system prevents blood leakage and reduces infection and needle stick risks, ensuring safer and more efficient IV therapy.

Features & Benefits:

- Active safety system reduces the risk of accidental needlestick injuries and enhances user safety.
- Closed infusion mode with integrated valve prevents backflow, blood leakage, and contamination.
- Stabilizing platform provide secure fixation and improved handling during insertion.
- Integrated sliding clamp enables precise flow control and helps prevent air entry and backflow.
- The transparent flashback chamber allows quick and accurate confirmation of vein puncture, ensuring safety.
- Latex-free, sterile, single-use design ensures patient comfort, safety, and infection control.

Easy-Vein® WIN Safe Super

I.V. Cannula without Wings & without Injection Port with Safety Feature

Easy-Vein WIN Safe Super: A sterile, single-use intravenous cannula featuring an integrated safety mechanism to prevent needle stick injuries, providing safe and reliable venous access without wings or an injection port.

Sharp Needle Tip

Safety Guard (Super)

Smooth Fixation Hub

Features & Benefits:

- The manual needle retraction safety mechanism helps reduce the risk of accidental needlestick injuries during needle withdrawal.
- Injection port allows easy and convenient medication administration.
- Flexible wings provide secure fixation and better handling control.
- Polyurethane and FEP catheter with an integrated radiopaque line, enabling X-ray visibility for accurate placement confirmation.
- Sterile, single-use design with transparent flashback chamber ensures safe and accurate vein access.

Features & Benefits:

- The manual needle retraction safety mechanism helps reduce the risk of accidental needlestick injuries during needle withdrawal.
- Polyurethane and FEP catheter with an integrated radiopaque line, enabling X-ray visibility for accurate placement confirmation.
- Compact, lightweight design enables easy handling and smooth insertion.
- Backflow control minimizes blood leakage and reduces contamination risk.
- Sterile, single-use construction ensures patient safety and effective infection control.

Wings & without
Injection Port

Accu-Vein or Easy-Vein IV Cannula with Wings and Injection Port : A sterile, single-use IV cannula designed for safe and smooth venous access. It features flexible wings for secure fixation, an injection port for easy drug administration, and a transparent chamber for quick vein puncture confirmation.

Features & Benefits:

- Flexible wings provide secure fixation and easy handling during insertion.
- Integrated injection port allows convenient medication administration without disconnecting the IV line.
- Transparent flashback chamber enables quick visual confirmation of venipuncture.
- Nickel-plated beveled needle ensures smooth and painless insertion.
- Made of medical-grade polypropylene using non-toxic materials to ensure patient safety and comfort.
- Sterile, single-use design reduces the risk of cross-contamination and infection.

Easy-Vein® WIN

I.V. Cannula without Wings,
without Injection Port &
with Hydrophobic Filter

Sharp Needle Tip

Smooth Fixation Hub

Square Needle Cover

Easy-Vein WIN IV Cannula: is a sterile, single-use device for safe venous access. Its hydrophobic filter prevents blood leakage and air entry, while the wingless design allows easy insertion and enhanced patient comfort during short-term therapy.

Features & Benefits:

- Hydrophobic filter prevents blood leakage and air entry, ensuring a clean and safe procedure.
- Wingless and portless design allows easy insertion and is ideal for short-term IV therapy.
- Sharp beveled needle ensures smooth and painless venipuncture.
- Transparent flashback chamber enables quick visual confirmation of vein access.
- Made of medical-grade polypropylene for strength, reliability, and biocompatibility.
- Sterile, single-use design ensures patient safety and infection control.

ACCU-FLOW *Airsafe* Regular

IV Set Vented with Auto Air Stop Filter

Accu-Flow Airsafe IV Set (Vented with Auto Air Stop Filter):

A sterile, single-use infusion set with a vented spike and an auto air stop filter that prevents air entry for enhanced patient safety. It ensures accurate flow control through a precision roller clamp and provides smooth, uninterrupted fluid delivery.

- Large drip chamber with air vent fitted with air stop filter: 20 drops $1 \pm 0.1\text{ml}$.
- DEHP free PVC tube; 180cm long with ID $\varnothing 2.8 \pm 0.1\text{mm}$, OD $\varnothing 3.8 \pm 0.1\text{mm}$.
- Luer lock ABS material.
- With Priming Filter at male connector tip for removing air.
- Sterile, Non-Toxic, Non-Pyrogenic, Single use only.

Also available

- Individual Paper pouch pack.

ACCU-FLOW™ *UV Shield Purge*

Light Resistant Infusion Set with Flow Regulator & Purge Filter

Accu-Flow UV Shield Infusion Set

is a sterile, single-use device for controlled delivery of light-sensitive fluids. Its UV-protected tubing prevents degradation, while the built-in flow regulator ensures precise control. The purge filter enables smooth priming and prevents air entry for safe infusion.

Features & Benefits:

- Accu-Flow UV shield Purge is designed for the administration of the light sensitive drugs.
- 15mm drip chamber with air vent and with air stop filter 20 drops = $1 \pm 0.1\text{ml}$.
- Amber Coloured PVC tube - 180cm Long; ID $\varnothing 2.9$, OD $\varnothing 3.9$.
- Male luer lock connector (with hydrophobic priming Filter).
- Integrated Flow Dial Regulator (0 to 250ml/Hour).
- The integrated 0.2μ purge filter ensures the removal of the particulate matter from the IV fluid (if any present).
- Individual Packaging in Paper Pouch.

Brand	Tube Length	Product code	Packaging	Qty. inner / Outer
ACCU-FLOW Airsafe Regular	180 cm	2BQPV	Paper Pouch	20/300
ACCU-FLOW UV Shield Purge	180 cm	2CUPV	Paper Pouch	20/300

EASY-SAAF CAP EASY-SAAF CAP Pro

Disinfectant Cap

Product Code: FG/PRO/60DC | FG/60DC

- Suitable for sterilizing and sealing indwelling needles, needle-free connectors, or similar medical devices.
- Disinfects the valve after application.
- Acts as a physical barrier against contamination for up to seven (7) days (168 hours) if not removed.
- Features an easy-to-grasp, hold, and twist tapered design that fits tightly and securely.
- Available individually or in strips of 10.

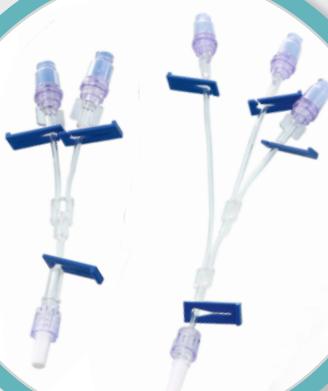

DEHP

ACCU-LINE (10/25/50/100/150/200/250)cm (Pressure Monitoring Line)

Product Code - 2FPPA /2FPPB / 2FPPC / 2FPPD
/ 2FPPE / 2FPPF / 2FPPG

- DEHP free PVC tube; ID $\varnothing 1.2 \pm 0.1\text{mm}$; OD $\varnothing 2.8 \pm 0.1\text{mm}$.
- 6% taper in luer lock allows connection with a variety of medical devices.
- Male & Female connector ABS material.
- Individual Packaging in Peel Open Pouch.
- E.O. Sterile.

DEHP

ACCU-SITE DUO & TRIO (Needle free valve with Extension Line)

Product Code UNO:DUO: 2GPND, TRIO: 2GPNT

- DEHP free PVC/PU tube 9 CM: ID $\varnothing 1.3 \pm 0.1\text{mm}$ OD $\varnothing 2.3 \pm 0.1\text{mm}$
- 6% taper on luer allow connection with a wide variety of medical devices.
- Luer lock with ABS material.
- Needle free valves made with latex free material to prevent entry of contamination.
- Individual packaging in peel open pouch.
- E.O. Sterile
